

NEW PRODUCT

M-Series Marine Carburetors

QFT brings its engineering expertise to the marine market. The M-Series feature billet-style metering blocks and throttle bodies for more precise performance and exceptional strength. Includes Clear-coated main body and bowls to resist corrosion. Interchangeable air bleeds and restrictors provide for additional fine tuning capability.

In Stock Now!

Part Number	Application and Description	CFM	
M-650	1.312" venturi, 1-11/16" throttle bore	650	In Stock
M-750	1.375" venturi, 1-11/16" throttle bore	750	In Stock
M-800	1.312" / 1.437" venturi, 1-11/16" throttle bore	800	Available
M-850	1.560" venturi, 1-3/4" throttle bore	850	Available
M-850-B2	1.560" venturi, 1-3/4" throttle bore	850	Available
M-4710	QFX, #6AN, 1.710" venturi w/ 2-circuit metering	1050	Available

- Billet Metering blocks w/ 4-corner idle adjustment
- Changeable idle air and high speed bleeds
- Built-in sight glass windows for easy float adjustment
- Changeable primary idle feed restrictors and power valve channel restrictors
- Preventative clear coat applied to main body and fuel bowls
- Teflon coated shafts with Teflon bearing ribbons and Stainless Steel plates
- Electric choke - fully adjustable, one wire hookup (M-650, M-750, M-800, M-850 only)
- Quicklink secondary adjustment for fast and easy changing of opening rates
- J Tubes to prevent spillage
